

FULL STACK DEVELOPER SUMMARY

- Full Stack Developer with 2+ years of experience creating exceptionally crafted and fully featured web applications and websites.
- Independently designed and developed a marketing website for an auto-detailing company using a full-stack ReactJS framework with the Wordpress REST API. It is fully featured with custom landing pages and a 2-dimensional tabbed component that allows users to see company offerings without scrolling. The project helped reduce page load speeds by 56%.
- Built a fully featured web application for a fictional hotel company renting cabins to guests. It is fully featured with a dashboard and tables to manage the company's cabins, bookings, and checking in and out guests, utilizing advanced React patterns like compound components.
- Built a fully operational clone of Airbnb with NextJS and MongoDB. Allow users to create listings, make and manage trips, and manage properties, reservations, and favorites.
- I am a persistent learner, open to new technologies and ways of thinking. Creativity lies outside the comfort zone!

WORK EXPERIENCE

PERFORMANCE PAINT PROTECTION FILM, LLC

FULL STACK DEVELOPER / DESIGNER

December 2020 - August 2022
